

# OAS Weather Station

A compact and fully wireless cellular design with real-time data collection. Its array of sensor parameters will help you plan, coordinate, and make informed decisions.

## Base Model Sensors:

Temperature

Relative Humidity

Wind Speed

Wind Direction

Global Radiation  
(Solar Radiation)

Barometric Pressure

Rain Gauge

## Optional Sensors:

Temperature/  
Relative Humidity  
at Ground Level

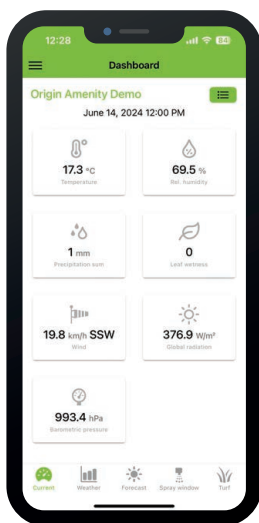

Leaf Wetness  
at Ground Level

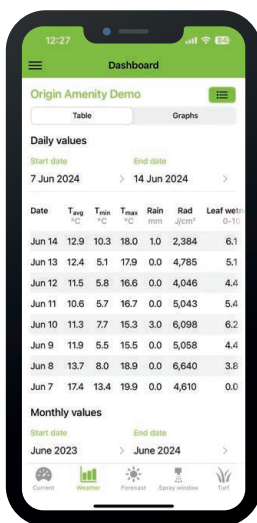

Soil Moisture/  
Temperature  
10cm, totaling 40cm

# Reliable weather data on-the-go

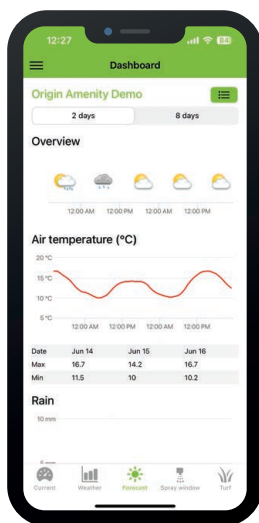

The OAS Weather Station links to a smart dashboard app for your mobile device. This app allows you to access all your weather station data from anywhere, providing historical records, real-time conditions, and weather predictions aiding smarter decisions on the go.

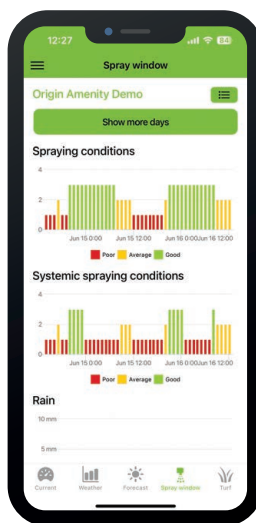

Real-time Conditions

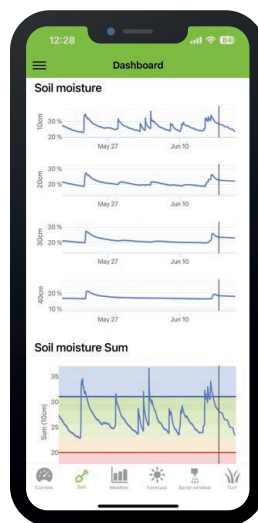

Historical Weather

8-day Forecast

Spraying Window and Conditions

Soil Probe Data

## Service contract includes (1-year, 3-year or 5-year)

- SIM card
- Data collection
- Processing and visualisation
- 8-day weather forecast for GPS location
- Daily status check
- Two maintenance visits per year
- Remedy of faults within five working days
